Employment History

02/2008 – 01/2020 **Information Technology Specialist**

Smithsonian Institution, Washington, DC

- Performed a crucial role in raising \$1.88 billion for the Smithsonian Campaign.
- Designed and developed website-based reporting requiring the creation of stored procedures, packages, custom views, and tables for the pan-institutional fundraising database.
- Built and maintained website applications and forms using ANSI standard PL/SQL, HTML, CSS & JavaScript code to satisfy development community data requests and enhancements.
- Developed technical specification documents and test plans for new reports and bug fixes – all in compliance with Smithsonian directives and government appropriations.
- Improved data quality by troubleshooting and reconciling gift data anomalies and provided entity merge support during new software conversion.
- Provided consistently accurate membership revenue and congressional district reports.

- Trained advancement staff on SI's standard procedures for using and coding for the fundraising database software.

11/2004 – 01/2008 **Operations and Grants Manager**
Generations United, Washington, DC

- Provided IT and network server support including setting up workstations, new email accounts, troubleshooting computer and mobile device systems issues.
- Prepared monthly accounting statements and quarterly financial reports for board members and executive leadership.
- Supported membership appeals and provided quarterly membership reports.
- Prepared bi-weekly payroll and other human resources duties including health insurance documentation and all non-profit tax and insurance compliance documentation and accounts payable.
- Processed donations and banking, accounts reconciling, and deposits.
